Workshop

The Philips LED Mini Inspection Lamp.

Philips work with experts to better understand how light affects worker performance in production environments. With these insights, Philips have designed lighting solutions that create safer work environments and reduce eyestrain by providing the right level of light. The Philips mini inspection lamp is small enough to clip onto your pocket and powerful enough to see into those dark spaces under the bonnet. The compact penlight comes with 2 different light patterns, a single LED with a focused beam that delivers 85 Lux at 0.5 meters and a wide flood beam that utilises 6 LEDs to deliver 250 Lux at 0.5 meters.

Best light quality:

- 6 powerful high-quality long lasting LEDs
- Main light: 250 Lux at 0.5m
- Cool white and very intense light (10,000K)
- LED pointer on top: 85 Lux at 0.5m

Shock resistance:

- Water & dust protected - IP54
- Resistant to chemical & workshop solvents
- Strong impact resistance

Long battery life:

- Up to 11 hours operation time
- 3 Philips AAA batteries included
