Heavy Duty, Automotive & Industrial

Invision represents the world's leading manufacturers

Delivering leading lighting solutions to the Oceania region

Invision Sales combines leading technology brands with innovative thinking to drive market growth. Established in 2002, Invision is a multifaceted company that specialises in the sales and marketing of lighting products in the Asia Pacific region.

Invision is the exclusive distributor of Tungsram Automotive Lighting, J.W. Speaker, Invision Headlight Restoration and Noxsolis. As a result, Invision holds a significant market share in automotive aftermarket, mining, agricultural and military industries.

Invision imports from several countries around the world and is located in Tullamarine, Victoria, close to all major international and domestic freight hubs.

Invision sales team of technical lighting specialists, sell through national distributors and retailers while working closely with OEM manufacturers based in Australia.

Senior Management – Aftermarket & OEM

Senior Technical Account Managers

Distribution to central warehousing

Emergency Direct to store delivery

Technical expertise in Automotive & Industrial Lighting

Industry leading marketing material & support

Consultation

Every work environment is different, and a lot of factors must be considered when selecting an optimal light source. Does it require a short intense spread of light, or a wider pattern. Is CRI or colour temperature required and do you require EMI protection.

Brand support

Invision's approach to marketing is based on delivering complete brand management solutions that are customer and market driven. Complete merchandising programs, POS and advertising for the retail market through to product storage and identification for the trade users and workshops, are an integral part of the overall marketing plan.

Distribution & training

Invision Sales work closely with a range of distributors in Australia and New Zealand to achieve a structured distribution approach to the market. By providing product training along with sales and marketing material, Invision provides the tools required by the distributors to achieve high sales results and retained operating margins.

OEM quality automotive bulbs

One of the easiest safety and styling adjustments you can make on your car is as simple as changing a light bulb. Yes, upgrading your headlights – besides numerous other advantages – can improve visibility, performance and style.

The latest Tungfram Upgrade Headlight lamps are designed for passionate people, looking for adventure, style and ultimate performance. With state-of-the-art technology improvements Tungfram includes a wide range of exciting and innovative products.

Full upgrade range

OEM Quality

Standard replacement

Cars, trucks & 4WDs

Restores headlights to as new condition

An advanced system that delivers improved headlight performance and clearer vision. As cars get older, the plastic headlight lenses deteriorate as a result of abrasion and UV exposure. The headlights become a dirty yellow colour with an opaque surface. This surface damage can dramatically reduce the light output and make headlights less effective. The Invision Headlight Restoration Kit is designed to restore plastic headlight lenses back to as new condition.

DIY kits

Exclusive UV protection

Trade kits

New Wipe Technology

PROKit for high volume

Premium Quality LED Lighting

Leading LED lighting rigorously tested in Australian conditions. You can depend on Noxsolis lighting for all hard-working 4WD, truck and agricultural applications.
