DELIVERING HI-TECH LIGHTING SOLUTIONS

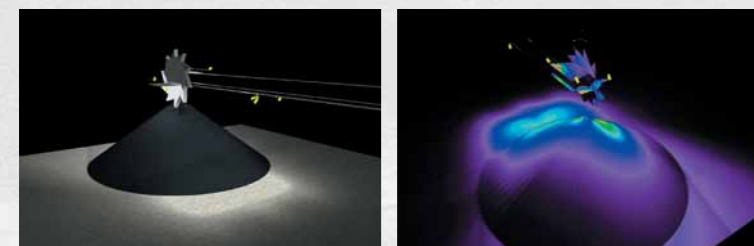

Invision Sales combines leading technology brands with innovative thinking to drive market growth. Established in 2002, Invision is a multifaceted company that specialises in the sales and marketing of lighting products in the Asia Pacific region.

When Invision Sales prepare a lighting solution for your business or work site, it is done utilising sophisticated 3D CAD software to create an accurate simulation.

Our engineers have the complete range of J.W. Speaker LED lighting specifications programmed into 3D Simulation Software, so that once your work site environment is created, they are able to design a lighting solution that is precise and accurate.

The lighting simulation means we are able to predict exactly how a particular light unit will perform and how effective it will be.

This process is a free consultation provided by Invision Sales with the aim of ensuring the optimal lighting solution is designed and implemented.

CONSULTATION

Every work environment is different, and a lot of factors must be considered when selecting an optimal light source. Does it require a short intense spread of light, or a wider pattern. Is CRI or colour temperature required and do you require EMI protection.

IP Ratings What do they mean?

The first number of the IP code indicates the degree of protection against solid foreign bodies such as dust intruding into an enclosure. The second number indicates the degree of protection for the equipment inside the enclosure against the harmful entry of various forms of moisture (e.g. dripping, spraying, submersion, etc.) For general outdoor use, IP65 is sufficient to withstand the effects of wind and rain.

First Number

- 0** No protection provided.
- 1** Protection against entry of objects larger than 50 square mm.
- 2** Protection against entry of objects larger than 12 square mm.
- 3** Protection against entry of objects larger than 2.5 square mm.
- 4** Protection against entry of objects larger than 1.0 square mm.
- 5** Protection against entry of dust in sufficient quantity to prevent satisfactory operation.
- 6** Complete protection against entry of dust.

Second Number

- 0** No protection provided.
- 1** Protection against drops of water falling vertically.
- 2** Protection against drops of water falling vertically when the luminaire is tilted up to 15 degrees from its normal position.
- 3** Protection from entry of water spray from angle of up to 60 degrees from vertical.
- 4** Protection from entry of water splashes or spray from any direction.
- 5** Protection from a low pressure jet of water in any direction.
- 6** Protection against heavy seas or a strong jet of water in any direction.
- 7** Protection against immersion up to 1 metre.
- 8** Protection against submersion over 1 metre.
- 9** Protection against close-range high pressure, high temperature spray downs.

CRI Colour Rendering Index

CRI or Colour Rendering Index refers to the ability of a light source to show the true colours of an object relative to their natural colour in daylight. CRI is measured on a scale from 0 to 100, with 100 representing true colour. High CRI ratings are incredibly important for industries that rely on true colour such as fruit plantations, vehicle painting and even the medical industry.

CRI Example

As shown in these images, a higher CRI rating of 90 shows vibrant and clear colour compared to the image on the far left which has a rating of 30. The amount of light shining on the objects is the same, but the difference in CRI rating means one image is dull and lacking in true colour and the other is vibrant and closer to daylight representation.

Lower CRI rating

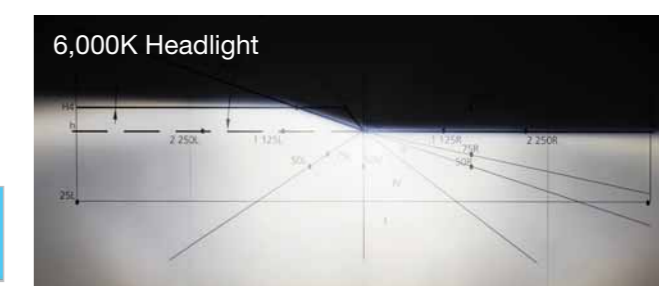

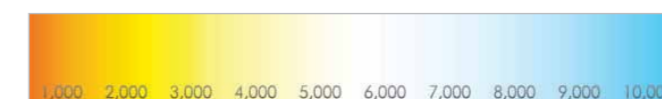

Higher CRI rating

Colour Temperature (K)

Colour Temperature or Kelvin (K) Rating refers to the colour of a light source in reference to the Kelvin scale. K Rating is often confused with a light's intensity but the two are very different. Commercial lighting often varies between 3,000K and 6,000K depending on the application. With 5000K considered daylight, many LED manufacturers aim for colour temperatures that offer a more natural looking light.

The difference between 3000K and 6000K is dramatic as highlighted in the images to the right. The 3000K product is much warmer looking compared to the cooler 6000K.

LED BULB KIT PERFORMANCE

ADVANTAGES TO UPGRADING FROM HALOGEN TO LED

If you're considering upgrading your or your customer's headlights from halogen to LED technology, look no further than the range of J.W. Speaker LED bulb kits.

Engineered to have a smooth, even and bright beam pattern, these LED bulbs are an easy sell when you consider the other benefits they bring to your driving.

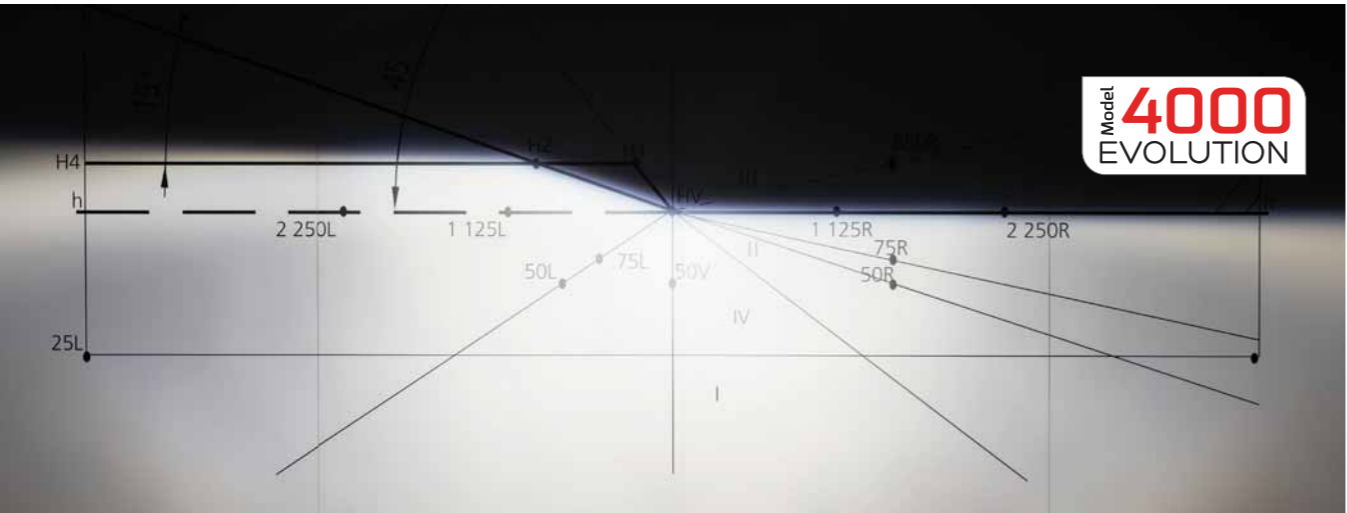

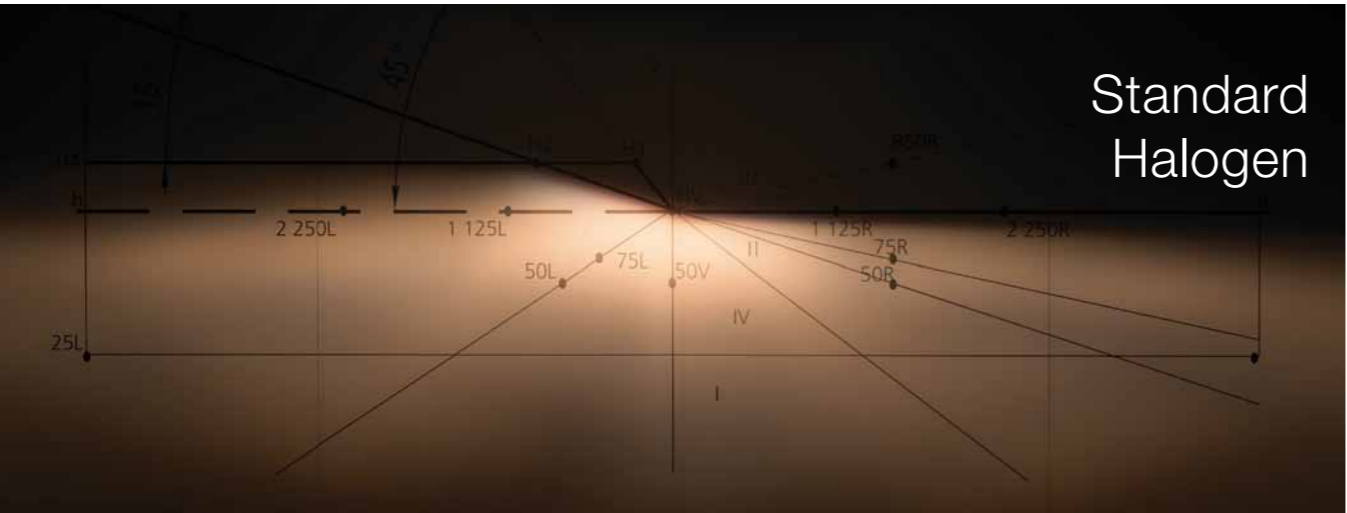

White Light

Halogen upgrade globes create a white light by applying a heavy blue coating to the glass. While this improves the light colour, it dramatically reduces the light output and life expectancy. LED delivers a much whiter light without the same limitations as the LED chip generates the precise white colour instead.

Long Life

Standard halogen bulbs are expected to last around 500 hours and a long life upgrade around 1,500 hours. Depending on how often you're using your headlight bulbs, this could mean you're changing headlight bulbs as often as every 3 months.

Current technology allows LED bulb kits to last for years which is why J.W. Speaker back these products with such impressive warranty periods. Not only do they last a long time, they are also more resistant to physical and electrical shock which is a major cause of halogen bulbs failing.

REFLECTOR & PROJECTOR HEADLIGHTS

HOW TO CHOOSE THE CORRECT BULB

There are two types of headlight systems used in automotive vehicles and they both generate a beam pattern in very different ways.

It is important to know which type your vehicle uses when selecting an LED bulb as some bulbs perform best in a particular headlight system.

Use the images below to determine the headlight style/s of your vehicle and keep an eye out for the Reflector or Projector icons and terminology on each LED bulb kit product page to see if they are optimised or suitable for your vehicle.

Model 4000 EVOLUTION

VEHICLE & BEAM SPECIFIC PRE-INSTALLED ADAPTOR CLIPS

There are a number of vehicles that use very specific H7 bulb retaining systems that stop the standard Model 4000 bulbs from fitting. (Pictured right)

For this reason, J.W. Speaker have developed two Model 4000 options with pre-installed adaptor clips to allow the bulbs to fit vehicles. (See below)

There are many other unique H7 bulb retaining systems on the market, particularly ones found in Hyundai, Mazda and Kia vehicles. Unfortunately they aren't compatible with the Model 4000 range and the Direct Fit bulbs will need to be used instead.

▶ **HIGH STABILITY

Vehicle & Beam Specific

Part No.	Base
990007C1	H7 with adaptor clip

The 990007C1 is optimised for **Ford FG Falcon, Ford SZ Territory, Mercedes ML164 (06-09) & Mercedes Vito Van (2009 tested).**

This product has the retaining clip pre-installed onto the bulb. It is not recommended to use this product in any other application.

PROJECTOR
OPTIMISED

Vehicle & Beam Specific

Part No.	Base
990007PC1	H7 with adaptor clip & rubber dust cap

The 990007PC1 is optimised for **Ford FG Falcon, Ford SZ Territory, Toyota Camry (2011 tested), Mercedes ML164 (06-09), Mercedes GLE (2013-14 tested) & Kenworth T610 Aero.**

This product has the retaining clip pre-installed onto the bulb. It is not recommended to use this product in any other application. This kit also includes a rubber dust cap to replace the original cap for better product fitment.

12V ONLY HALOGEN REPLACEMENT

2800 LUMENS PER BULB*

- 5700K WHITE LIGHT
- IP65 WATERPROOF
- 2 YEAR LIMITED WARRANTY
- 2 HEADLIGHT BULBS PER KIT
- **NOT APPROVED FOR ADR, ECE OR DOT**

Specifications

- Lumen: See Table
- Colour Temp: 5700K
- Power: 26W Per Beam
- Voltage: DC12-16V
- Operating temperatures: -40° / +130°C
- IP Rating: IP65

Warranty

2 Year – Standard Driving Conditions:
For normal day to day driving & recreational 4x4.

Kit Contains

2 x LED Headlight Bulbs

H8 / H9 / H11 / H16

**IDENTICAL
FITMENT
TO HALOGEN BULB**

The sizing of the new Direct Fit Plus bulbs are as identical to Halogen sizing as possible.

The H7 specifically is now compatible with most unique H7 retaining systems and headlights due to the new collar design and bulb size.

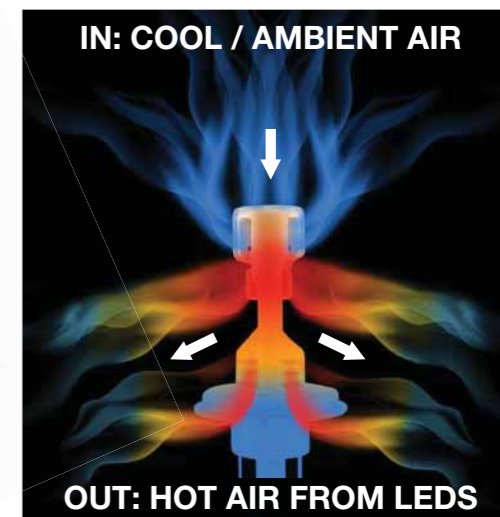

PREMIUM FAN COOLING

ADVANCED AIRFLOW FOR
BETTER PERFORMANCE

The new Direct Fit Plus range uses premium cooling fans to help reduce heat stress on the LED chips by drawing cooler air into the bulb and past the circuit board.

This active cooling allows the Direct Fit Plus bulbs to have a higher light output compared to the standard Direct Fit with its more passive TST cooling.

12V - 24V HALOGEN REPLACEMENT 2000 LUMENS PER BULB

- 5700K WHITE LIGHT
- IP65 WATERPROOF
- 2 YEAR LIMITED WARRANTY
- 2 HEADLIGHT BULBS PER KIT
- **NOT APPROVED FOR ADR, ECE OR DOT**

Specifications

- Lumen: 2000 per bulb
- Colour Temp: 5700K
- Power: 18W Per Beam
- Voltage: DC12-24V (H15 999015 12V Only)
- Operating temperatures: -40° / +130°C
- IP Rating: IP65

Warranty

2 Year – Standard Driving Conditions:
For normal day to day driving & recreational 4x4.

PREMIUM TST COOLING THERMOELECTRIC SEPARATION TECHNOLOGY

TST is a new and important cooling technology to the J.W. Speaker range of Direct Fit LED bulbs.

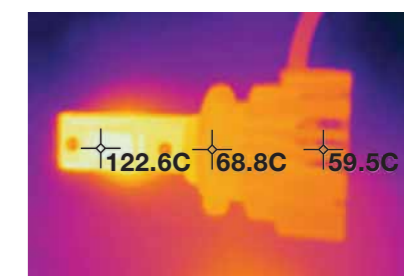

Instead of using PCBs (printed circuit board) and thermal silicone like most LED bulbs, TST sees the attachment of the LED chips directly to the alloy shaft of the bulb. This process allows for a more even distribution of heat, ultimately reducing the strain on the LED chips and leading to longer life and a more stable beam performance.

These diagrams show the heat readings on a traditional LED bulb vs the new Direct Fit bulb using TST cooling. The TST cooling measures a heat difference of only 8°C between LED chips and the base of the bulb where as the standard LED bulb measures more than **DOUBLE** the heat difference of base to chips.

**IDENTICAL
FITMENT
TO OEM BULB**

Headlights that use Xenon bulbs are typically designed with that bulb in mind and allow almost no extra space for aftermarket products and the other components they tend to come with.

This is where the new Direct Fit range really shines, offering a comprehensive selection of Xenon base types as LED replacements that are identical in size and fitment.

CONNECTS DIRECTLY TO OEM CABLE / BALLAST

One of the most important features of the new Direct Fit Xenon replacement range is that they are 100% compatible with the original vehicle cable / ballast unit and the electrical systems of the vehicle.

No extra products like CANbus modules will be required for a successful bulb installation.

SPECIFIC HALOGEN REPLACEMENT

VEHICLE & BEAM SPECIFIC LED VOLKSWAGEN LOW BEAM KIT

The 990007VW is unique in that it is designed specifically to replace Volkswagen H7 low beam bulbs that use a very specific clip-in system. This system has been used in other vehicles by other manufacturers but it has been predominantly used by Volkswagen.

A key feature with this range is that it has built in CANbus technology, meaning the LED bulb will be able to communicate with the vehicle without causing any errors or fault codes.

It is recommended to consult a qualified auto electrician before installing this product to make sure it is suitable for your vehicle. A list of Volkswagen models that this product is suitable for can be found below.

H15 MULTI FUNCTION HIGH BEAM & DRL

The H15 bulb type has become very popular with vehicle manufacturers in recent years, with its dual filament system offering a high beam and lower output daytime running light beam from the same bulb.

Due to the nature of the way it's locked into the headlight, this bulb and the Direct Fit system is the only high quality H15 option on the market.

990015F is considered a halogen replacement compared to the higher output 999015 Direct Fit kit which is more of a performance upgrade.

Part No.	Base
990015F	H15

Specifications

- Lumen: 550 per bulb (Fog)
80/600 per bulb (H15)
- Colour Temp: 6000K
- Power: 30W Per Beam
- Voltage: DC12-24V
- Operating temperatures: -40°/ +130°C
- IP Rating: IP65
- Lifetime: Up to 30,000 hours

Warranty

2 Year – Standard Driving Conditions:
For normal day to day driving & recreational 4x4.

1 Year – Off-Highway:
For mining and industrial applications.

Kit Contains

2 x LED Bulbs

This product range is **not approved for ADR, ECE or DOT**

LED CANBUS TECHNOLOGY
SUITABLE FOR MODEL 4000 & DIRECT FIT

Some vehicle electronic systems may conflict with the LED bulb. There are a limited number of vehicles who's electronic systems may require the addition of a CANbus unit during installation.

The CANbus unit will allow the vehicles electronics to accept the LED bulb into its system.

One simple way of checking if your vehicle is monitoring your headlight bulbs is to:

1. With the vehicle turned off, carefully disconnect one of the headlight bulbs you are looking to replace with an LED product.
2. Start your vehicle and turn on your headlights, switching to the beam / bulb you are wanting to test. For thorough testing, switch between low and high beam multiple times.

3. If you are receiving a 'globe out' warning light similar to the above or a fault message anywhere inside your vehicle, you will require a CANbus product to aid in a successful bulb installation.

CANbus Options

SIGNAL

INCANDESCENT REPLACEMENT

LED SIGNALLING

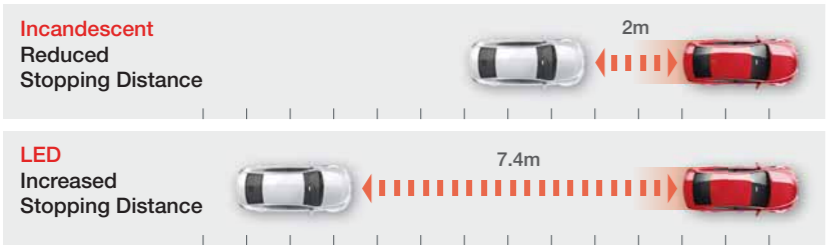

BAYONET, FESTOON & WEDGE

Aside from the known benefits of increased life, LED Signalling bulbs actually offer one more vital upgrade over standard incandescent bulbs which is 'activation speed'.

Something people don't often consider is the speed at which a bulb reaches full illumination. Traditional signalling bulbs take time to ignite and reach full output, compared to LED bulbs which reach maximum intensity almost instantaneously.

This means that the LED bulb can be 'seen' much quicker than the incandescent bulb and in a traffic situation where milliseconds can make the difference, LED bulbs are the safest choice.

The near instantaneous illumination of LED gives drivers more time to stop

With LED bulbs, the driver sees the brake lights earlier and gains a vital 5.4m stopping distance. Based on a vehicle travelling at 100km/h.

RESISTOR

Part No.	Type	Pack Qty.	Voltage
990160	5W	Twin	12V
990161	25W	Twin	12V
990165	25W	Twin	24V

Note: A CANbus resistor may be required on some vehicles when fitting this signalling range. Please consult a qualified Auto Electrician if you experience issues.

Signalling Bulb Kit Warranty

2 Year – Standard Driving Conditions:
For normal day to day driving & recreational 4X4.

1 Year – Off-Highway:
For mining and industrial applications.

This product range is **not approved for**
ADR, ECE or DOT

Forward Lighting

J.W. Speaker have been setting new standards in LED headlights for over a decade with continuous innovation and development that has seen the range grow to meet the specific needs of many industries.

J.W. Speaker has developed a complete LED forward lighting solution for just about everything including trucks, 4WDs, mining vehicles and buses. All of these lighting solutions are exact replacements making extremely easy to upgrade old halogen headlight bulbs and sealed beams to the high powered, pure clean white light of LED.

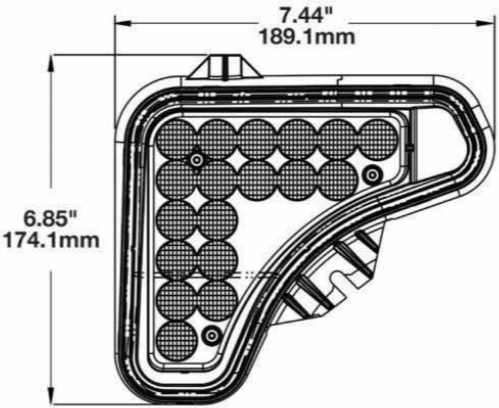

OEM BOBCAT

LED HEADLIGHT REPLACEMENT KIT

PART NO:
0557613

PRODUCT SPECIFICATIONS

Colour Temp:	White 5000K
Lumen Output:	Raw: 1728 Effective: 1050
Input Voltage:	12V DC
Current Draw:	1.50A @ 12V DC
Lens Material:	Polycarbonate
Body Material:	Nylon
Connector:	OEM Bobcat Connection (PE 12124819)
OEM Headlight Replacement:	Left Side: 7251341, 7138041 & 7399583 Right Side: 7251340, 7138040 & 7399582
Standards:	Sealed to IP67
Weight:	530 grams per light
Pack Qty:	Twin (Left & Right)

MODEL 527

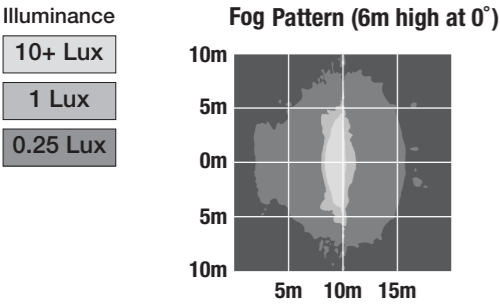

10" x 5" FOG LIGHT FOR HEAVY VEHICLES

PART NO:	COLOUR:
0551261	White
0551281	Amber

PRODUCT SPECIFICATIONS

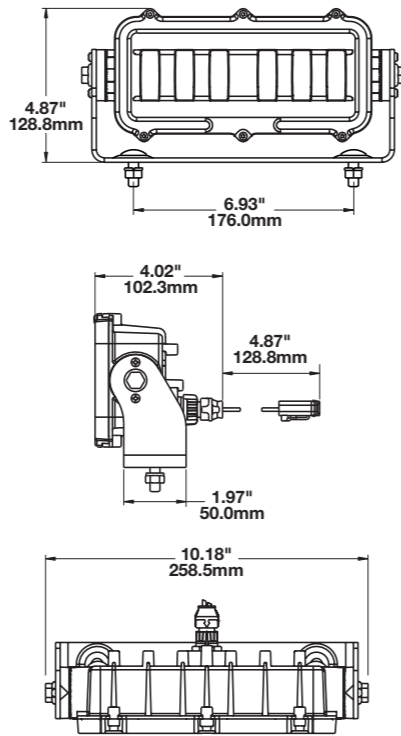

Colour Temp:	White 5000K or Amber
Lumen Output:	Raw: 1,500 (White); 960 (Amber) Effective: 640 (White); 400 (Amber)
Input Voltage:	12V - 24V DC
Current Draw:	1.2A @ 12V DC 0.8A @ 24V DC
Bezel:	Black
Lens Material:	Glass
Body Material:	Xenoy Resin
Mounting:	Universal Pedestal Mount (x2) M8-1.25 Mounting Bolt
Connector:	Integrated 2-Pin Deutsch Weather Proof Socket (DT04-2P)
Wiring:	Red Wire: Positive Black Wire: Negative
Standards:	Sealed to IP69K
Weight:	1.18kg
Pack Qty:	Single

MODEL 8700 EVO 3

7" ROUND HEADLIGHT INSERTS - 12V ONLY

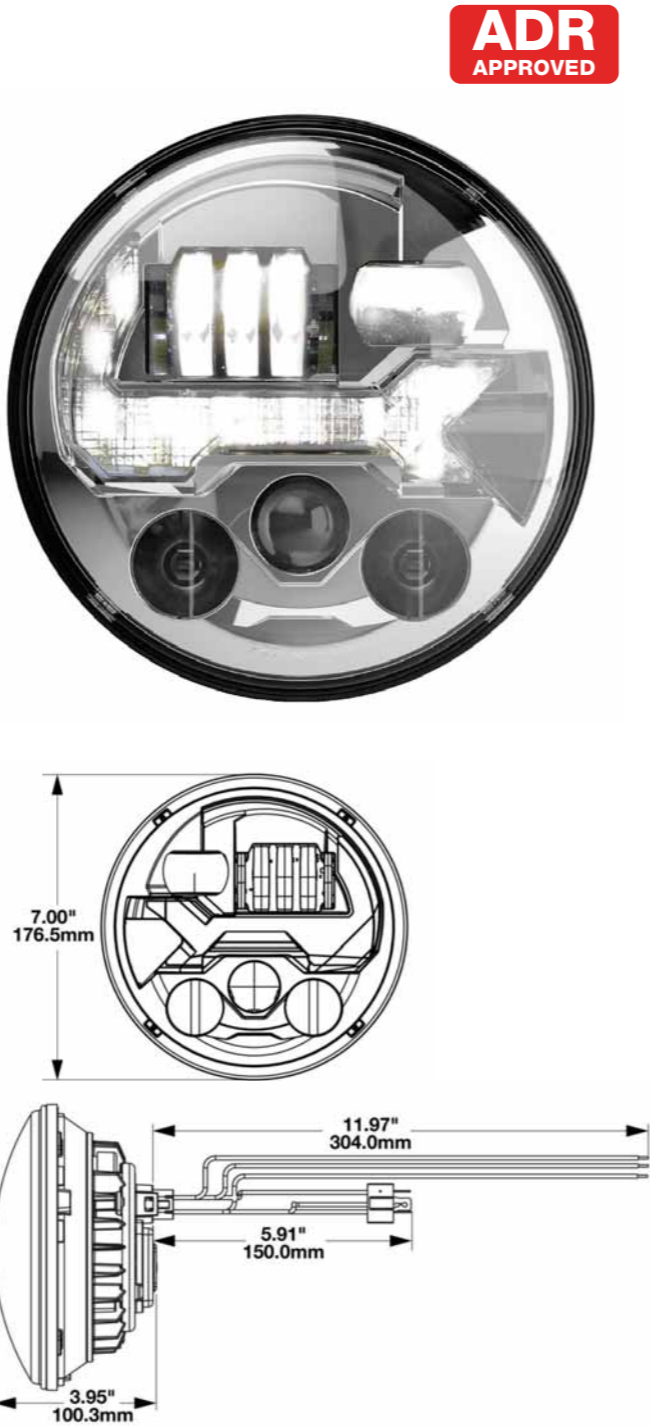

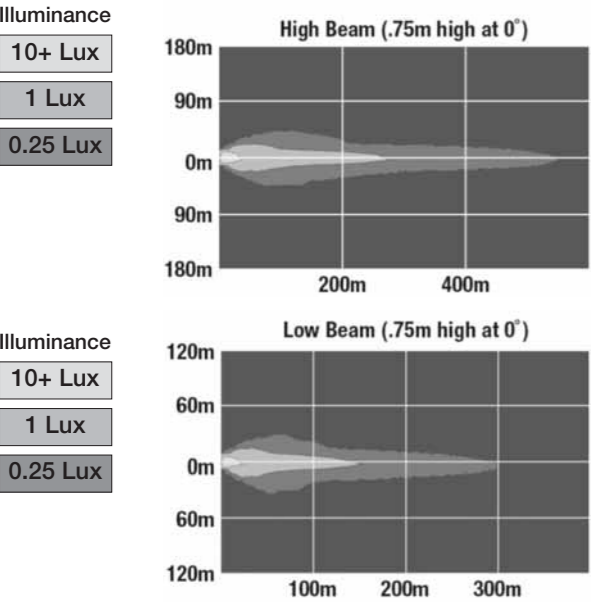

Low Beam | High Beam | Turn | Park | DRL
With Dual Burn® Technology

PART NO:
0558243 Twin Pack (Left & Right)

PRODUCT SPECIFICATIONS

Colour Temp:	White 5000K
Lumen Output:	Raw: 3,600 (High); 3,020 (Low) Effective: 1,320 (High); 1,201 (Low)
Input Voltage:	12V DC
Maximum Current Draw:	3.25A @ 12V DC (High Beam)
Bezel:	Chrome
Lens Material:	Polycarbonate
Body Material:	Aluminium
Mounting:	2D1 "PAR56" or 7" round headlights
Connector:	H4 / (3X) 11.97" Flying Leads
Wiring:	Black Wire: Ground Yellow Wire: Low Beam White Wire: High Beam Brown Wire: Front turn Red Wire: Position Blue Wire: Daytime Running Light
Standards:	IEC IP69K ECE Reg 7, 87 & 112
Weight:	1.12kg per light
Pack Qty:	Twin (Left & Right)

High Beam

Low Beam

Front Position + DRL

Low Beam + Turn Signal

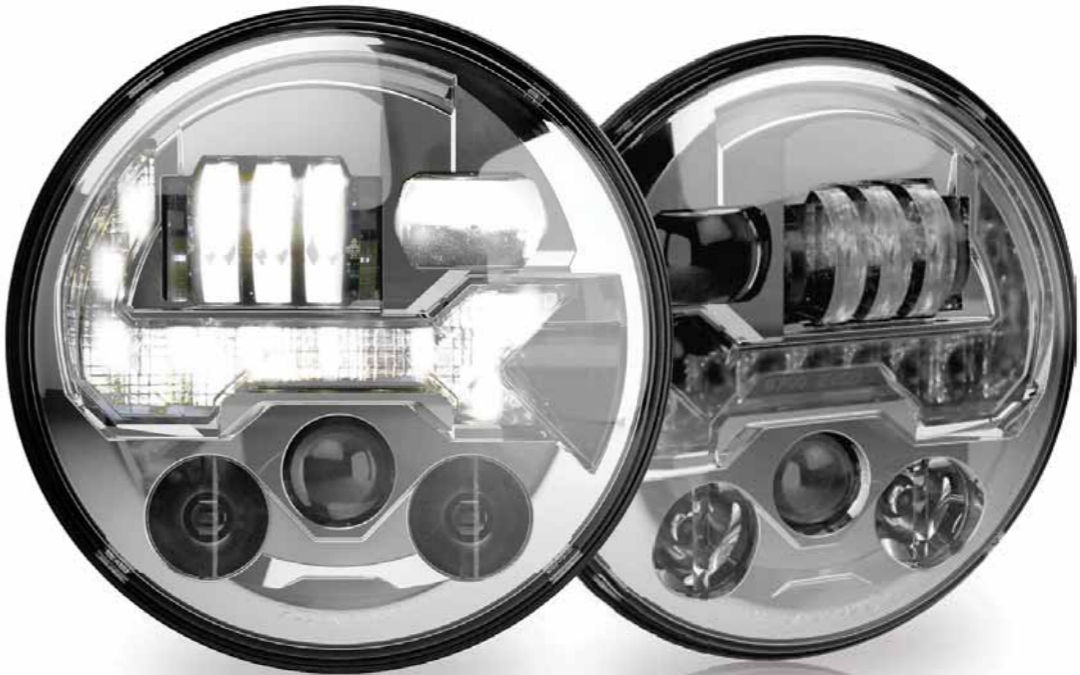

High Beam: Dual Burn® for both widespread long-distance visibility

Low Beam: Brilliant short-range illumination

Daytime Running Light: Eye-catching visibility for daytime driving

Turn Signal: Amber LEDs stand out against white for clear indications

Front Position: Emit brilliant white LED light for maximum visibility

The 8700 EVO 3 kit contains specific Left and Right hand side units.

MODEL 8700 EVO 2 PRO

7" ROUND HEADLIGHT INSERTS

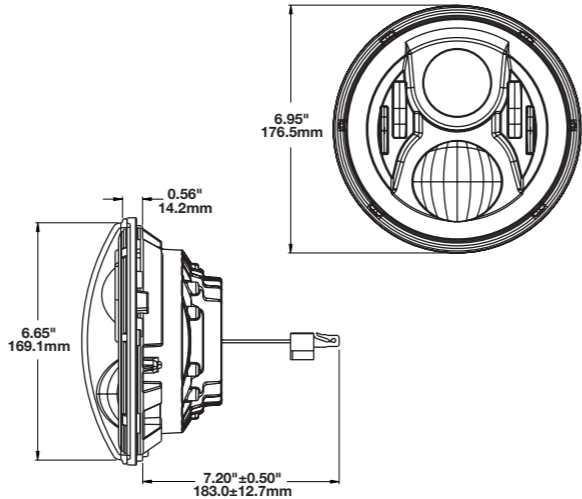

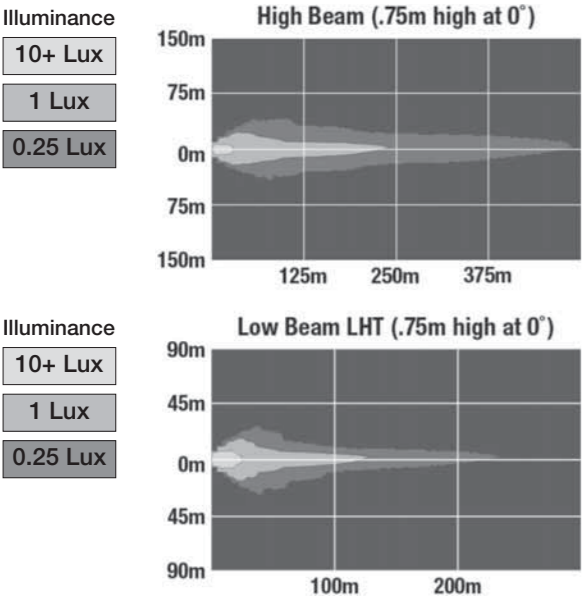

Low Beam | High Beam | Park | DRL
With Dual Burn® Technology

MODEL 8700 EVO 2 PRO

WITH HEATED LENS TECHNOLOGY

Same Product Specifications

PART NO:	BEZEL:
0556331	Chrome

How does it work?

1. A SmartHeat LED light will automatically turn on at startup or when the temperatures drops.
2. The SmartHeat technology uses an internal sensor to sense the current temperature. If the technology senses the temperature to be below the low temperature threshold, the heat will stay on to de-ice the lens.
3. Once the ice has melted and the light has warmed up to meet the high temperature threshold, the SmartHeat grid system will automatically turn off.

Emergency

J.W. Speaker is a worldwide supplier of quality emergency lighting to heavy duty markets such as mine sites, transport, agricultural and emergency services. The company is a world leader in achieving record levels of light output from LED technology and manufacturing light housings that protect the technology in the adverse conditions they operate under.

As specialists in heavy duty emergency lighting, J.W. Speaker has a comprehensive range of LED strobes, work lights and scene lights to suit every application.

J.W. Speaker emergency lighting are specifically designed to meet the stringent regulations in light output, sealing, EMI, vibration and construction. As with all J.W. Speaker products, the emergency range is designed and manufactured in the USA ensuring complete control over the on going quality management and engineering development.

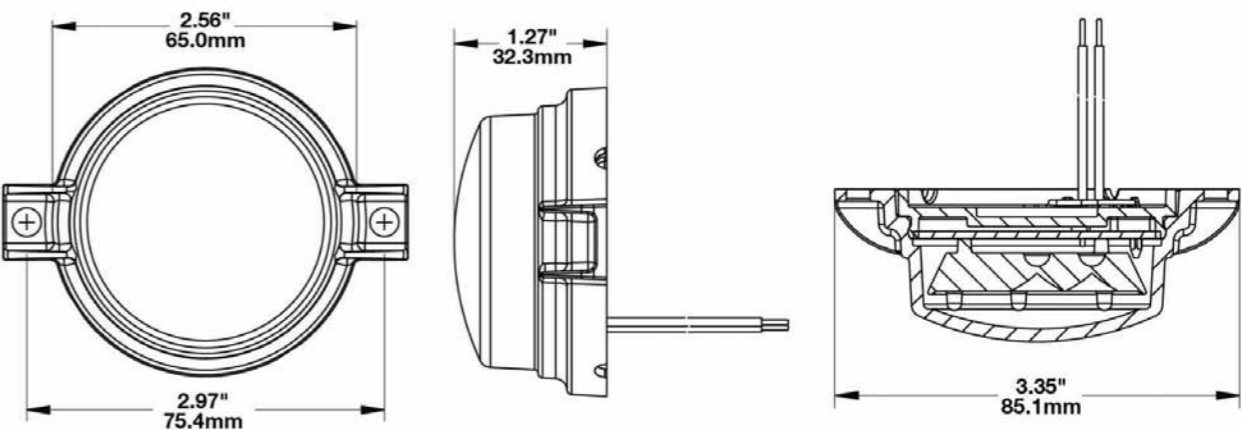

MODEL 146

65mm AMBER WARNING LIGHT

PART NO:
0646321

PRODUCT SPECIFICATIONS

Colour Temp:	Amber
Input Voltage:	12V - 48V DC
Current Draw:	0.100A @ 12V DC 0.050A @ 24V DC 0.035A @ 36V DC 0.030A @ 48V DC
Lens Material:	Polycarbonate
Body Material:	Polycarbonate
Mounting:	Low Profile - Two Point Mount
Connector:	6" Leads
Wiring:	Red Wire: Positive Black Wire: Negative
Modes:	1: Warning Flashing
Standards:	Sealed to IP67
Weight:	110 grams
Pack Qty:	Single

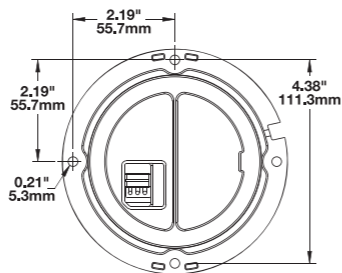

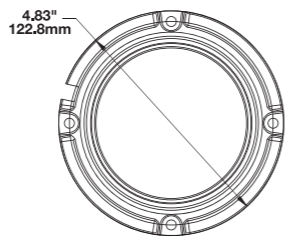

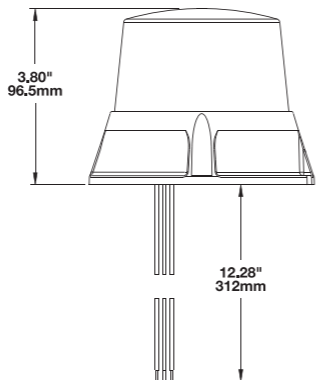

MODEL 406

5" ROUND STROBE LIGHTS - CLASS 2

PART NO:	COLOUR:

Zone Lighting

J.W. Speaker have taken Warning and Emergency lighting to a whole new level with the design and development of the Zone Warning Lamp ranges. These unique products create a clearly defined no go zone in red light or blue around a vehicle or machinery. At the flick of a switch, a Red Zone Warning Lamp instantly illuminates an entire area in powerful red light to clearly indicate the exclusion or warning zone. For larger areas, multiple units can be combined to create one large beam pattern making the product extremely versatile for any application.

J.W. Speaker understand the requirements of the heavy duty market, so have designed their Zone Warning Lamps bright enough to be visible in daylight making it ideal for use 24 hours a day. It's extremely important that vehicles and machinery have clearly marked no go zones even during the day, something no other product has been able to achieve.

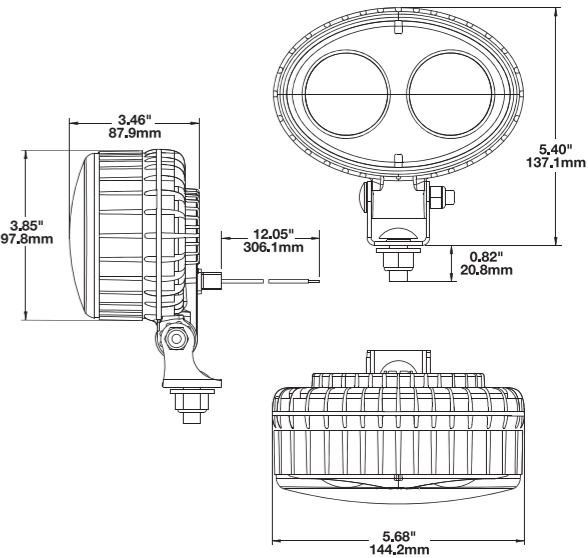

MODEL 770

5" x 3" OVAL SAFETY ZONE LIGHTS

Sharp Spot Beam Pattern

PART NO:	COLOUR:
1706441	Red
1706311	Blue

PRODUCT SPECIFICATIONS		
Colour Temp:	Red or Blue	
Input Voltage:	12V - 110V	
Maximum	1706441 - Red	1706311 - Blue
Current Draw:	0.19A @ 12V DC	0.50A @ 12V DC
Lens Material:	Polycarbonate	
Body Material:	Polycarbonate	
Mounting:	Universal Pedestal Mount (x1) M10-1.5 x 25mm Bolt	
Connector:	Integrated 2-Pin Deutsch Weather-Proof Socket (DT04-2P)

MODEL 560

6" x 4½" RECTANGLE SAFETY ZONE LIGHT

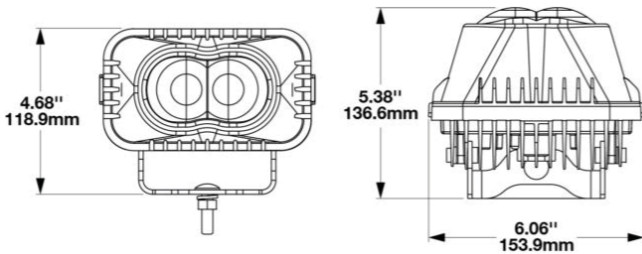

Universal Warning Beam Pattern

PART NO: COLOUR:
1300661 Red

PRODUCT SPECIFICATIONS

Colour Temp:	Red
Input Voltage:	12V - 72V DC
Maximum Current Draw:	3.6A @ 12V DC (Steady On Mode)
Lens Material:	Acrylic
Body Material:	Aluminium
Mounting:	Adjustable Pedestal Mount with Single Carriage Bolt
Connector:	PE 12110293
Wiring:	Red Wire: Positive White Wire: Negative Black Wire: Mode Selection
Standards:	Sealed to IP69K
Weight:	670 grams
Pack Qty:	Single

Mode Selection:

Select desired mode by touching the **BLACK** wire to **RED** wire for 1-2 seconds. The light's mode will switch to next state per the below table. Once the desired state is set, the **BLACK** wire can be removed or capped off. The lamp will remain in selected mode.

Modes:

Mode 0: Outer LED: Steady On	Inner LED: Steady On
Mode 1: Outer LED: Flash 60 per min (1Hz)	Inner LED: Flash 60 per min (1Hz)
Mode 2: Outer LED: Triple flash 60 per min (1Hz),	Inner LED: Triple flash 60 per min (1Hz)
Mode 3: Outer LED: Flash 60 per min (1Hz),	Inner LED: Triple flash 60 per min (1Hz)
Mode 4: Outer LED: Flash 200 per min (2Hz),	Inner LED: Flash 200 per min (2Hz)
Mode 5: Outer LED: Flash 60 per min (1Hz),	Inner LED: Steady On

Signalling

The J.W. Speaker LED signalling lighting range is ideal of vehicles like trucks, mining vehicles and 4WDs that experience harsh conditions and long hours of use. Being the world's most innovative manufacturer of heavy duty LED lighting products, Speakers engineer's have custom designed this series of rear lighting to incorporate new technologies, making it the most advanced range on the market.

The J.W. Speaker commitment to advanced, solid-state lighting technology has enabled the range to meet the requirements of Australia's transport and mining industries.

MODEL 220

93 - Pedestal Mount Bracket

Part No.	Description	Pack Qty
8001621	Double Lamp Pedestal Mount Bracket	Single

97 - Mounting Frame

Part No.	Description	Pack Qty
8001511	3-Point Mount for 3mm Mounting Frame	Single

97 - Pedestal Mount Kit

Part No.	Description	Pack Qty
8001521	Single Pedestal Mount Kit	Single

8800 EVO 2 - Dual Headlight Assembly

Part No.	Description	Pack Qty
3156600	Right Hand Dual Headlight Assembly	Single
3156680	Left Hand Dual Headlight Assembly	Single

8630 & 8631 - EVO Ring Kits

Part No.	Description	Pack Qty
8200001	Single Ring Kit Mounting Assembly	Single
8200071	Mounting Ring suit Fire Truck	Single

527 - Protective Rock Guard Kit

Part No.	Description	Pack Qty
8200151	Protective Rock Guard Kit	Single

6130 EVO Single Ring Kit

Part No.	Description	Pack Qty
8000861	Single ring kit mounting assembly	Single

8630 & 8631 - EVO Ring Kits

Part No.	Description	Pack Qty
3157751	Double Ring Kit Mounting Assembly	Single

6404 / 6406 - Converter Boxes

Part No.	Input	Output	Wattage	Dimensions
0842291	100-240V	24V	35W	200 × 78 × 49mm
0842301	100-277V	24V	150W	281 × 106 × 58mm
0842311	100-277V	24V	240W	281 × 106 × 58mm

DC Output Harness - With DC Terminal Kit

Part No.	Description	Length
3269681	DC Output Harness	3 Meters

DC Output Harness - With ICONN Connector

Part No.	Description	Length
3269371	DC Output Harness	1 Meters
3269671	DC Output Harness	3 Meters
