Pack Quantity	1

Installation & Application Information

Step 1

Using a PH2 drill bit or screw driver, remove the three screws on the bottom of the beacon base.

Step 2

Remove the beacon base and place the NX380 nut in the centre cavity on the bottom of the beacon.

Step 3

Reinstall the beacon base making sure the nut is sitting correctly behind the plastic.

Step 4

Thread the NX380 magnetic base into the centre nut through the plastic base.
